Redefining the meaning of comfort

After the frenzy of a hectic day,
seek comfort in the heavenly embrace
of your bed.

Reinvigorate yourself on cloud nine,
night after night.

Sleep into the darkness of the night, under the twinkling stars,
and wake up to the soothing rays of the morning sun.

Rejuvenated and fully inspired on the new
King Koil Embrace® Collection bed ...

King Koil Embrace®

Designed to pamper

The new generation of King Koil Embrace® Collection mattresses conforms to your unique body contour and cradles you while you sleep. It provides true seclusion, with virtually no partner disturbance.

King Koil Embrace® is responsive to your body temperature. When absorbing body warmth it becomes softer and let the body sink deeper into the mattress. The contact surface of the body with the mattress becomes greater, spreading the body weight over a wider surface and therefore relieving pressure points. Your body will be restored during the night and new energy is gathered.

King Koil Embrace® has an open cell structure, which allows optimal air ventilation within the layer itself. Moisture will evaporate nearly straight away and keep your mattress therefore hygienic and comfortable.

After all, it is primarily the combination of King Koil Embrace® and Talalay® latex that determines how well you sleep at night, and in turn, how rejuvenated you feel during the next day.

King Koil Embrace®
Open cell structure and
excellent ventilation properties

Talalay®

The King Koil Embrace® Collection is designed to meet the highest standards

Every detail is meticulously attended with you in mind.

A Talalay® latex mattress features 5 different comfort zones that are anatomically designed for correct sleeping posture and exquisite comfort.

The head and shoulder zone is designed to give a proper level of firmness. The upper and lower body zones are softer, while the body's heaviest part - the lower back - has a firmer zone and therefore prevents sagging. The lower legs zone is softer in support.

Talalay® latex is hypo-allergenic; it inhibits the growth of dust mites and other micro-organisms and keeps therefore the mattress hygienic and odor free.

King Koil Embrace® pampers you, while Talalay® latex provides you with the support you need for a blissful night's sleep.

Talalay® Latex
Open cell structure

Comfort is not about softness.
It is about support.

The ideal mattress is one that cradles you, supporting you from head to toe without pressure points.

Bamboo Velour

Nature's gift

No other material can match bamboo yarn, which is being used as a cover of King Koil Embrace Collection. It has its own unique characteristics and inherent anti-bacterial property, which ensures the mattress ticking remains fresh and odorless for the whole lifespan of the mattress.

Bamboo yarn comes with its own, extremely efficient built-in ventilation system.

Moisture passes through the hollow strands so quickly, it dries nearly straight away. This quick drying property is perfect for a mattress upholstery, since body temperatures often transform into moisture in the form of perspiration.

You will remain moisture balanced and comfortable all night at the temperature that is right for your body.

Princess Anna
EMBRACE
KING
KOIL

The superb craftsmanship and meticulous attention to every detail is evident wherever you look on your King Koil Embrace® Collection bed.

The precise stitching of the fabric, a genuine leather zipper, the smooth bamboo velour, with King Koil Embrace® Collection logo embroidered in on top of the mattress. Details that work together to create a bed for life.

Princess Anna™

You don't just sleep on a mattress; you begin an enduring love affair.

This mattress comes with a combination of 5 cm King Koil Embrace® and 2 cm of Talalay® latex. It has 5 anatomically-designed comfort zones for correct sleeping posture and exquisite comfort.
